

ETA 23

Digital Earth Resistance Tester

Features

- **2P, 3P Earth Resistance Measurement** : Ensures testing for any type of earthing
- **Wide Operating Temp. upto 60°C** : Offers high reliability in extreme temp.
- **CAT IV 300V & IP 40 protection** : Ensures Safety & convenience of operation
- **Earth voltage measurement up to 450V AC**: Useful for identifying the Earth faults
- **Interference & Noise Rejection up to 50V PP**: Ensures accurate working in the presence of noise

Application

- Electrical installations and maintenance
- Substation grounding validation
- Preventive maintenance and safety audits
