

P30 Series

Accurate • Reliable • Efficient

Transform the way you measure, monitor, and control electrical parameters with our advanced range of Electrical Transducers. Designed for precision and durability, they deliver seamless conversion of electrical signals into standardized outputs for superior process automation and energy management.

Features

- **High Accuracy & Stability** - Trusted performance in critical applications
- **Wide Measurement Range** - Voltage, Current, Frequency, Power, Energy
- **Compact Robust Design** - Built for long-term, reliable operation
- **Multiple Output Options** - Analog & digital outputs for easy integration
- **Isolation Protection** - Enhanced safety and system reliability
- **Compliance** - Meets international standards (IEC/EN)

Application

Power Generation & Distribution

Energy Monitoring & Management

Industrial Automation & Control Systems

Building & Infrastructure Systems

Testing & Calibration Labs

Sifam Tinsley Instrumentation Inc.
