

ALCT 60A Delta

Smart AC/DC leakage Clamp Meter

ALCT 60A is designed for the on-line measurement of AC/DC leakage current, which adopts the latest CT digital integration technology. The lean clamp is suitable for places full of concentrated cables such as automation panels, control panels, electric power metering system, high-speed rail system

Features

- Compact size leakage clamp meter - makes it portable & easy to carry
- Current measurement from 1mA to 60A AC/DC - caters wide current range from low to high
- Data storage facility upto 99 records - eliminates the need of manual recording
- Complies with CE & CAT - ensured protection

Applications

Great use for testing of AC/DC mA current in automation panels, control panels, electric power metering system, high-speed rail system, automobile circuit maintenance and for measuring the mA signals for PLC and control system analog I/O (Inputs and Outputs)
